2 Introduction

In April 2008, the LISS panel completed a questionnaire on work and schooling, as part of the LISS Core Study. The survey was repeated in June 2008 for panel members that did not complete the questionnaire in April. The questionnaire was presented to 8591 panel members, of which 6691 completed the questionnaire (response percentage 77.9%).

This survey is repeated every year.

3 Codebook

This codebook contains the questionnaire as administered to the LISS panel.

- The variable names are printed in **bold** and correspond to the names in the dataset.
- The questionnaire routing is printed in *italics* for each variable concerned.
- *open*: answer box; no limit to the length of the answer
- *string*: answer box that permits entering a maximum number of characters (default is 255)
- For numerical variables, the range from which the respondent could choose an answer is presented in italics in the codebook if this range was not visible to the respondent. If there were no limits to the range within which an answer could be given, this is indicated in the codebook as *'integer'*.
